

ACTIVITY 2: Testing the Account Class

Objective

Write a test class that uses the `Account` entity class and handles all display logic.

Requirements

Create a test class `TestAccount.java` that:

1. Creates two accounts
2. Tests deposit functionality (including invalid deposit)
3. Tests withdrawal functionality (including insufficient balance)
4. Displays all account information (formatting done in test code)

Expected Output

When you run your test class, the output should look like this:

```
=====
GLOBAL DIGITAL BANK - ACCOUNT TEST
=====
>>> 1. Creating Account
Account created!
Account #1001 | John Doe (25 yrs) | Savings | ₹1000.0 | Active
>>> 2. Deposit Money
Depositing ₹500.0: SUCCESS
New balance: ₹1500.0
Depositing ₹-100.0: FAILED (Invalid amount)
>>> 3. Withdraw Money
Withdrawing ₹200.0: SUCCESS
New balance: ₹1300.0
Withdrawing ₹2000.0: FAILED (Insufficient balance)
Current balance: ₹1300.0
>>> 4. Creating Another Account
Account #1002 | Jane Smith (30 yrs) | Current | ₹2000.0 | Active
>>> 5. All Accounts
Account #1001 | John Doe (25 yrs) | Savings | ₹1300.0 | Active
Account #1002 | Jane Smith (30 yrs) | Current | ₹2000.0 | Active
=====
TEST COMPLETED!
=====
```

Task

Write the complete `TestAccount` class in a file called `TestAccount.java`. Handle all display formatting in this test class.
